Introduction

Sharpening your team's cloud skills begins here

Achieve your goals with the freedom and flexibility to build, manage, and deploy your applications anywhere. Use your preferred languages, frameworks, and infrastructure—even your own data center and other clouds—to solve challenges large and small. With help from Microsoft Azure, you have everything you need to build your next great solution.

Microsoft Learn supports IT pros, developers, and data and AI professionals to get the skills they need to cover all the aspects of digital transformation—managing on-premises, hybrid, or cloud infrastructure; innovating with the best-in class applications; and supporting apps and infrastructure with data and analytics, all with the proper security considerations.

The right journey leads to long-term growth

A map for the next milestone

Use this guidebook to discover the recommended journey for you or your team. The following pages describe the recommended tracks learners can take to receive the maximum benefits of Azure training and certification.

Master the basics and beyond

Each journey is designed to help managers and learners identify where to start and where to go based on their specific role or projects.

Everything you need in one place

After determining which journey is the right fit, find courses, training opportunities, and other important information that sets you or your team up for success.

Master the basics

Instructor-led training

Self-paced learning

Microsoft Virtual Training Days

Exam preparation

Practice Assessments on Microsoft Learn

Microsoft Certifications

Cloud IT pros

Hybrid cloud IT pros

Developers

Data & AI professionals

Data analysts

New to the cloud or new to Azure

Azure fundamentals

Recommended for these roles

Course AZ-900 Exam AZ-900

New to Azure administration

Prerequisites for Azure administrators

Prerequisites for Azure administrators

Course AZ-104

New to data solutions on Azure

Azure data fundamentals

Course DP-900 Exam DP-900

New to AI or new to AI on Azure

Azure AI fundamentals

Course AI-900 Exam AI-900

New to Microsoft Power Platform

Power Platform fundamentals

Course PL-900 Exam PL-900

Training journey for cloud IT pros

Grow in role

 Instructor-led training

 Self-paced learning

 Microsoft Virtual Training Days

 Exam preparation

 Practice Assessments on Microsoft Learn

 Microsoft Certifications

Start here

Implement and manage secure cloud solutions

Azure administrator

 Course AZ-104

 Exam AZ-104

Choose additional paths that best fit your role and projects

Implement and manage secure cloud solutions

Azure security engineer

 Course AZ-500

 Exam AZ-500

Deliver virtual desktop experiences and remote apps on Azure

Azure Virtual Desktop administrator

 Course AZ-140

 Exam AZ-140

Manage SAP solutions on Azure

Azure for SAP workloads

 Course AZ-120

 Exam AZ-120

Implement and manage networking solutions

Azure network engineer

 Course AZ-700

 Exam AZ-700

Microsoft Virtual Training Day events

These are in-depth, virtual training events that guide you toward the many possibilities for career and organizational impact today and tomorrow. With weekly events to match every skill level, they offer an opportunity to grow your technical skills and to gain the confidence to navigate what's ahead.

Microsoft Azure Virtual Training Days

- **Azure Fundamentals** > aligned to Exam AZ-900 skills
- **Azure AI Fundamentals** > aligned to Exam AI-900 skills
- **Azure Data Fundamentals** > aligned to Exam DP-900 skills
- **Modernize .NET Apps** > recommended for Azure developers
- **Linux OSS Database Migration** > recommended for Azure database administrators
- **Migrating On-Premises Infrastructure and Data**
> recommended for Azure database administrators
- **Azure Virtual Desktop**
> recommended for Azure Virtual Desktop administrators
- **DevOps with GitHub** > recommended for DevOps engineers
- **Well-Architected** > recommended for Azure solution architects
- **Deliver Integrated Analytics with Azure Synapse**
> recommended for Azure data engineers
- **Implementing Hybrid Infrastructure**
> recommended for Windows Server hybrid administrators
- **Cloud Native Apps** > recommended for Azure developers
