

VMware Site Recovery Manager 8.x: Install, Configure, Manage

VMware Site Recovery Manager 8.x: Install, Configure, Manage

Dieser 2-tägige Kurs beinhaltet die Installation, die Konfiguration und die Bedienung des VMware vCenter Site Recovery Managers. Darüber hinaus ist auch das Testen der Disaster Recovery-Pläne mit dem Site Recovery Manager Bestandteil des Trainings.

Kursinhalt

- Course Introduction
- Site Recovery Manager Architecture
- Deploying and Configuring Site Recovery Manager
- Configuring Inventory Mappings
- Using Array-Based Replication
- vSphere Replication
- Replicating VMs Using vSphere Replication
- Protection Groups
- Recovery Plans
- Executing Recovery Plans
- Monitoring and Troubleshooting

E-Book Sie erhalten englischsprachige Unterlagen von VMware als E-Book.

Zielgruppe

Dieses Seminar richtet sich an erfahrene vSphere Administratoren, Architekten, Systemingenieure und -integratoren, die für den Einsatz und die Verwaltung des SRM zuständig sind.

Voraussetzungen

Einer der folgenden Kurse sollte vorab besucht worden sein:

- VMware vSphere: Install, Configure, Manage
- VMware vSphere: Fast Track
- VMware vSphere: What's New
- VMware vSphere: Troubleshooting

Oder vergleichbares Wissen und Administration-Erfahrung mit VMware ESXi™ and VMware vCenter Server™.

Inhaltsverzeichnis

VMware Site Recovery Manager 8.x: Install, Configure, Manage

1 Course Introduction

- Introductions and course logistics
- Course objectives

2 Site Recovery Manager Architecture

- Describe Site Recovery Manager architecture
- Identify disaster recovery options with Site Recovery Manager
- Evaluate how Site Recovery Manager integrates with VMware products
- Describe Site Recovery Manager licensing options
- List the disaster recovery topologies supported by Site Recovery Manager
- Describe how VMware Site Recovery for VMware Cloud on AWS integrates with Site Recovery Manager

3 Deploying and Configuring Site Recovery Manager

- Identify the vSphere and vCenter Server requirements for deploying Site Recovery Manager
- Define Site Recovery Manager virtual appliance system requirements
- Deploy the Site Recovery Manager appliance
- Navigate the Site Recovery Manager configuration UI
- Describe the process for registering Site Recovery Manager with vCenter Server
- Describe how to start and stop services in Site Recovery Manager
- Identify ways to perform updates to the Site Recovery Manager appliance
- Describe the options for accessing the Site Recovery Manager
- Describe the process for configuring site pairing
- Describe how to import and export Site Recovery Manager configuration
- Navigate the Site Recovery Manager configuration UI
- Describe the process for registering Site Recovery Manager with vCenter Server
- Describe how to start and stop services in Site Recovery Manager
- Identify ways to perform updates to the Site Recovery Manager appliance
- Describe the options for accessing the Site Recovery Manager
- Describe the process for configuring site pairing
- Describe how to import and export Site Recovery Manager configuration

4 Configuring Inventory Mappings

- Explain the importance of inventory mappings
- Identify configuration options for inventory mappings

- Describe the importance of placeholder virtual machines and datastores
- Describe the importance of the vSphere inventory changes for Site Recovery Manager operation

5 Using Array-Based Replication

- Describe array-based replication
- Describe Storage Replication Adapters and explain their role for the array-based replication
- Describe the concept and configuration of array pairs
- Describe datastore groups and the relationship between devices and datastore groups
- Describe the role of consistency groups
- Identify the advantages of array-based replication

6 vSphere Replication

- Describe Site Recovery Manager with vSphere Replication Architecture
- Discuss the role of vSphere Replication components
- Discuss use cases for vSphere Replication
- Discuss system requirements and operational limits of vSphere Replication
- Determine how to calculate bandwidth requirements for vSphere Replication
- Identify the advantages of vSphere Replication
- Deploy a vSphere Replication appliance
- Configure a vSphere Replication appliance and register it with vCenter Server
- Pair vSphere Replication appliances
- Deploy an additional vSphere Replication server
- Register a vSphere Replication server with a vSphere Replication management server

7 Replicating VMs Using vSphere Replication

- Describe the replication process used by vSphere Replication
- List vSphere Replication replica states
- Describe vSphere Replication of encrypted virtual machines
- Describe vSphere native key provider
- Describe how to configure vSphere Replication
- Discuss vSphere Replication RPO settings
- Describe MPIT instances
- Describe additional vSphere Replication settings
- Describe how to disable vSphere Replication

8 Protection Groups

- Define protection group functionality
- Examine the differences between array-based protection groups, protection groups based on vSphere

Replication, and Virtual Volumes protection groups

- Create a protection group
- View a placeholder virtual machine in the inventory
- Configure protection for virtual machines and edit protection groups

9 Recovery Plans

- Discuss recovery plan concepts
- Discuss network planning
- Discuss the organization of storage for recovery plans
- Describe customization options in recovery planning
- Describe priority groups and VM dependencies
- Describe how to implement a recovery plan
- Configure VM recovery plan properties
- Describe the customization of recovery plans
- Configure additional steps in the recovery plan
- Delete a recovery plan

10 Executing Recovery Plans

- Discuss use cases for Site Recovery Manager
- Describe planned migration
- Identify Site Recovery Manager workflows
- Examine Site Recovery Manager integration with various vSphere technologies
- Describe how to conduct a recovery plan test
- Perform a recovery plan test
- Identify the effect on the storage layer during the test recovery steps
- Review the recovery plan test steps
- Describe how to cancel a recovery plan test and clean up after recovery plan test cancellation
- Explain a recovery plan execution in planned migration or disaster recovery mode
- Identify the recovery steps for each execution type
- Describe a forced recovery
- Explain the importance of re-protection processes and states
- Examine failback steps
- Describe how to reprotect a data center

11 Monitoring and Troubleshooting

- Identify Site Recovery Manager alarm options
- Generate Site Recovery Manager recovery plan history reports
- Configure Site Recovery Manager advanced settings
- Identify Site Recovery Manager logs
- Describe the vRealize Operations management pack for Site Recovery Manager
