

Horizon Cloud Service Next-Gen on Microsoft Azure Deploy and Manage

Diese praxisorientierte Schulung vermittelt Ihnen die Kenntnisse, Fähigkeiten und Fertigkeiten, die Sie benötigen, um Horizon® Cloud Service auf Microsoft Azure bereitstellen und verwalten zu können. In dieser Schulung lernen Sie auch, wie Sie die Horizon Universal Console und das Microsoft Azure-Portal verwenden.

Durch eine Kombination aus praktischen Übungen und interaktiven Lektionen lernen Sie, wie Sie Images für VDI- und RDSH-Zuweisungen importieren und verwalten. Außerdem lernen Sie, wie Sie die Horizon® Universal Broker™-Funktion, App Volumes, Omnissa Access und Dynamic Environment Manager in der Horizon Cloud Service on Microsoft Azure-Bereitstellung konfigurieren und nutzen können.

Kursinhalt

By the end of the course, you should be able to meet the following objectives:

- Describe the architecture of Horizon Cloud Service on Microsoft Azure
- Discuss the initial Microsoft Azure configurations required for the Horizon Cloud Service on Microsoft Azure deployment
- Discuss Horizon Cloud Service on Microsoft Azure networking concepts
- Discuss Horizon Cloud Service on Microsoft Azure Active Directory (AD) requirements and integration best practices
- Discuss the integration of Omnissa Access with Horizon Cloud Service on Microsoft Azure
- Discuss the requirement for deploying Horizon Cloud Service on Microsoft Azure
- Demonstrate how to deploy or upgrade Horizon Cloud Service on Microsoft Azure
- Identify the Horizon Cloud Service console controls that are available for administrators
- Identify Horizon Cloud upgrade features and benefits
- List the steps and considerations to take when setting up a primary VM to be used as an assignable image
- List the steps to install the user software on the primary VM
- Describe pools and pool groups
- Explain the creation process and configuration options for single and multisession pools and pool groups
- Create Single-Session and Multi-Session desktop assignments and entitlements
- Explain power management options in the single and multi-session pool groups
- Manage assignable images on Horizon Cloud Service on Microsoft Azure
- Describe how to use Horizon Image Management Service for Horizon Cloud Service on Microsoft Azure
- Identify how to access desktops and application from Horizon Cloud Service on Microsoft Azure
- Describe the integration of Dynamic Environment Manager with Horizon Cloud Service on Microsoft Azure
- Manage user personalization and application configurations using the Dynamic Environment Manager management console and application profiler
- Discuss the usage of App Volumes for Horizon Cloud Service on Microsoft Azure
- Interpret scalability considerations for Horizon Cloud Service on Microsoft Azure
- Apply troubleshooting techniques relevant to Horizon Cloud Service and Microsoft Azure
- Summarize the analytics and monitoring capabilities in Horizon Cloud Service on Microsoft Azure

Zielgruppe

- Systems Integrators
- Systems Administrator
- Cloud Administrators
- Solutions Architects
- Solution Engineers
- Account Manager
- Sales Engineers
- Microsoft End-User Computing Specialists
- Consultants

Inhaltsverzeichnis

Horizon Cloud Service Next-Gen on Microsoft Azure Deploy and Manage

1 Course Introduction

Introduction and course logistics
Course objectives

2 Introduction to Horizon Cloud Service on Microsoft Azure

Discuss the features and benefits of Horizon Cloud Service on Microsoft Azure
Identify the available Horizon Cloud and Microsoft licensing options
Identify the system architecture components of Horizon Cloud Service on Microsoft Azure
Explain how Dynamic Environment Manager is used in Horizon Cloud profile management
Describe Horizon Cloud application management using App Volumes
Identify the Microsoft Azure configuration prerequisites for a Horizon Cloud integration
Identify the main Microsoft Azure components required for a Horizon Cloud deployment
Review the virtual machines supported in Horizon Cloud Service on Microsoft Azure

3 Microsoft Azure Networking Requirements

Discuss Horizon Cloud connectivity considerations and tasks
Explain the networking concepts for Horizon Cloud Service on Microsoft Azure
Identify the ports required for local connections, remote connections, and endpoint OS firewall rules

4 Identity Management

Explain computer identity type and user identity type
Discuss the best practices for Horizon Cloud Service on Microsoft Azure AD integrations
Determine the requirements for Horizon Cloud Service on Microsoft Azure AD
Describe the benefits of integrating Horizon Cloud with Omnisia Access
Explain how a user obtains access to an entitled virtual desktop or application from the Workspace ONE® Intelligent Hub catalog
Discuss the importance of binding directory with Workspace ONE Access and setting up custom user attribute synchronization
Discuss the importance of configuring the Remote App Access client in Omnisia Access
Demonstrate how to access an entitled Horizon virtual

desktop or application in the Workspace ONE Intelligent Hub catalog

5 Deployment and Upgrades

Explain the steps and requirements for deploying Horizon Cloud Service on Microsoft Azure
Describe the features and benefits of Horizon Edge
Describe the differences between internal and external gateways
Outline the Horizon Universal Console controls available for administrators
Identify the features and benefits of the Horizon Cloud upgrades

6 Creating Images

Outline the process and configuration choices for setting up primary VMs
Identify the configuration choices for importing primary VMs
List the steps to install the user software on the primary VM
Explain how to convert a configured primary VM to an assignable image
Describe pools and pool groups
List the steps for configuring an image to a pool
List the steps for configuring an image to a pool group

7 Pool Groups

Compare dedicated assignments to floating assignments
Outline the steps for creating a VDI desktop assignment
Explain the entitlement of desktops
Outline the creation process and configuration options for multisession pools and pool groups
Explain the power management selections in the multisession pool groups
Compare the rolling maintenance and load-balancing options
Identify the actions related to the multisession groups page
Identify the actions to add and assign applications to a user or group
Outline the prerequisites for entitling a multisession assignment
List the steps for creating a multisession assignment

8 Accessing Desktops and Applications

Identify the different versions of Horizon Client
Describe how to access desktops and remote

applications with Horizon Client
Describe how to access desktops and remote applications with a browser
Compare the remote display protocols that are available for Horizon Cloud
Describe the Blast Extreme display protocol codecs
List the ideal applications for each Blast Extreme codec
Describe the Blast Extreme policy configurations

9 Managing Images

Describe images
Explain how to manage images

10 Dynamic Environment Manager on Horizon Cloud Service on Microsoft Azure

Identify the functional areas of Dynamic Environment Manager and their benefits
Explain how to use the Dynamic Environment Manager console and application profiler to manage user personalization and application configurations

11 App Volumes for Horizon Cloud Service on Microsoft Azure

Explain how App Volumes works with Horizon Cloud Service on Microsoft Azure
Identify the features and benefits of App Volumes in Horizon Cloud Service on Microsoft Azure
Identify the interface elements of App Volumes in Horizon Cloud Service on Microsoft Azure
Demonstrate how to configure App Volumes in Horizon Cloud Service on Microsoft Azure

12 Scalability Considerations

Recognize the scalability settings for Horizon Cloud Service on Microsoft Azure

13 Troubleshooting Horizon Cloud Service on Microsoft Azure

Explain the troubleshooting basics for Horizon Cloud Service on Microsoft Azure
Identify the analytics and monitoring capabilities of Horizon Cloud Service on Microsoft Azure
Explain the troubleshooting basics for Horizon Cloud
