

VMware Horizon 8: Virtual Desktop BootCamp

VMware Horizon 8: Virtual Desktop BootCamp

VMware Horizon® 8: Virtual Desktop BootCamp is a five-day combination course of VMware Horizon 8: Skills for Virtual Desktop Management and VMware Horizon 8: Virtual Desktop Troubleshooting. This training combination gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform.

You build skills in configuring and managing VMware Horizon 8 through a combination of lecture and hands-on labs. You learn how to configure and deploy pools of virtual machines and how to provide a customized desktop environment to end-users. Additionally, you learn how to resolve common issues that occur in a VMware Horizon environment.

You engage in a series of lab exercises to bring existing environment issues to resolution. The exercises mirror real-world troubleshooting use cases. These exercises equip learners with the knowledge and practical skills to manage typical challenges faced by virtual desktop administrators and operators.

Kursinhalt

- Course Introduction
- Introduction to VMware Horizon
- Introduction to Use Case
- vSphere for Horizon 8
- VMware Horizon Desktops
- VMware Horizon Agents
- VMware Horizon Pools
- VMware Horizon Client Options
- Creating and Managing Instant-Clone Desktop Pools
- Creating RDS Desktop and Application Pools
- Monitoring VMware Horizon
- Overview of Virtual Desktop Troubleshooting
- Command-Line Tools and Backup Options
- Troubleshooting VMware Horizon Linked Clone Desktops
- Troubleshooting Instant Clones
- Windows Client
- Ports and Protocols

E-Book Sie erhalten englischsprachige Unterlagen von VMware als E-Book.

Zielgruppe

Operators, administrators, and architects responsible for the creation, maintenance, or delivery of remote and virtual desktop services.

Voraussetzungen

Customers attending this course should have, at a minimum, the following VMware infrastructure skills:

- Use VMware vSphere® Web Client to view the state of virtual machines, datastores, and networks
- Open a virtual machine console on VMware vCenter Server® and access the guest operating system

Attendees should also have the following Microsoft Windows system administration experience:

- Configure Active Directory services, including DNS, DHCP, and time synchronization
- Restrict user activities by implementing Group Policy objects
- Configure Windows systems to enable Remote Desktop Connections
- Build an ODBC connection to an SQL Server database

Kursziel

VMware Horizon 8: Skills for Virtual Desktop Management is the first half of a two-course requirement for the following certification:

- VMware Certified Professional – Desktop and Mobility 2020 (VCP-DTM 2020)

VMware Horizon 8: Virtual Desktop Troubleshooting does not satisfy a course requirement for the VCP-DTM exam.

Stand 27.04.2024

Inhaltsverzeichnis

VMware Horizon 8: Virtual Desktop BootCamp

1 Course Introduction

- Introductions and course logistics
- Course objectives

2 Introduction to VMware Horizon

- Recognize the features and benefits of Horizon
- Describe the conceptual and logical architecture of Horizon

3 Introduction to Use Cases

- Convert customer requirements to use-case attributes
- Define a use case for your virtual desktop and application infrastructure

4 vSphere for VMware Horizon

- Explain basic virtualization concepts
- Use VMware vSphere® Client™ to access your vCenter Server system and VMware ESXi™ hosts
- Create, provision, and remove a virtual machine

5 VMware Horizon Desktops

- Create a Windows and a Linux virtual machine using vSphere
- Optimize and prepare Windows and Linux virtual machines to set up Horizon desktop VMs

6 VMware Horizon Agent

- Outline the configuration choices when installing Horizon Agent on Windows and Linux virtual machines
- Create a golden image for Windows and Linux Horizon desktops

7 VMware Horizon Pools

- Identify the steps to set up a template for desktop pool deployment
- List the steps to add desktops to the VMware Horizon® Connection Server™ inventory
- Compare dedicated-assignment and floating-assignment pools
- Outline the steps to create an automated pool
- Define user entitlement
- Explain the hierarchy of global, pool-level, and user-level policies

8 VMware Horizon Client Options

- Describe the different clients and their benefits
- Access Horizon desktop using various Horizon clients and HTML
- Configure integrated printing, USB redirection, and

the shared folders option

- Configure session collaboration and media optimization for Microsoft Teams

9 Creating and Managing Instant-Clone Desktop Pools

- List the advantages of instant clones
- Explain the provisioning technology used for instant clone desktop pools
- Set up an automated pool of instant clones
- Push updated images to instant clone desktop pools

10 Creating RDS Desktop and Application Pools

- Explain the difference between an RDS desktop pool and an automated pool
- Compare and contrast an RDS session host pool, a farm, and an application pool
- Create an RDS desktop pool and an application pool
- Access RDS desktops and application from Horizon Client
- Use the instant clone technology to automate the build-out of RDSH farms
- Configure load-balancing for RDSHs on a farm

11 Monitoring VMware Horizon

- Monitor the status of the Horizon components using the Horizon Administrator console dashboard
- Monitor desktop sessions using the HelpDesk tool

12 Overview of Virtual Desktop and Application Virtualization Troubleshooting

- Identify VMware Horizon architecture and supportability using VMware Documentation
- Apply systematic troubleshooting methods to logically diagnose faults by collecting valid and accurate information regarding the environment and problems
- Identify the different approaches to take when a problem occurs and how to document them

13 Command-Line Tools and Backup Options

- Describe key Horizon Connection Server features that are available as CLI options with the vdmadmin command
- Identify and collect the log locations for each VMware Horizon component
- Describe the VMware Horizon backup and restore and its benefits
- Identify the Database reporting functionality and the steps to resolve inconsistencies

14 Troubleshooting Machines and Desktops

- Identify the information available in the Help Desk Tool
- Identify a variety of procedures to diagnose and fix problems that you encounter when you create and use machines and desktop pools
- Identify procedures you can follow to diagnose and fix problems while creating and using Linux desktops

15 Troubleshooting Horizon Linked Clone Desktops

- Describe the components that make up a Horizon desktop
- Explain how the View Agent Direct-Connection plug-in is useful for diagnosing problems
- Highlight the best practice for optimizing a VMware Horizon desktop
- Troubleshoot common problems with VMware Horizon desktops

16 Troubleshooting Instant Clones

- Discuss how instant clones are created
- Discuss what gets logged when an instant clone is created
- Discuss the keywords to look for in the logs when troubleshooting instant clones
- Discuss how to troubleshoot problems with instant clones

17 Troubleshooting Horizon Client

- Identify steps that you can follow to solve problems related to Windows Horizon Client
- Identify steps that you can follow to solve problems related to Linux Horizon Client
- Identify steps that you can follow to solve problems related to HTML Horizon Client
- Identify steps that you can follow to solve problems related to Mac Horizon Client

18 Troubleshooting Common Client Connection Issues

- Discuss the key ports and protocols used in Horizon Environment
- Discuss how to troubleshoot black screen problems

19 Troubleshooting Device Redirection

- List troubleshooting steps applicable to USB Redirection issue
- Discuss Nested RDSH Redirection
