

# The Professional Program Overview

We have significantly invested in our technical training which has resulted in the creation of our “Professional” certification.

The evolution of Extreme Networks Technical Training provides a comprehensive progressive pathway from Associate to Professional accreditation which develops and extends the individuals industry knowledge credentials.

Whatever the role, whatever the professional aspirations, Extreme Networks now offers a wider choice of technical competency training enabling the differentiation between technical skills: installation, advanced configuration, management, and troubleshooting, empowering you to acquire recognition in the industry on your accomplishments.

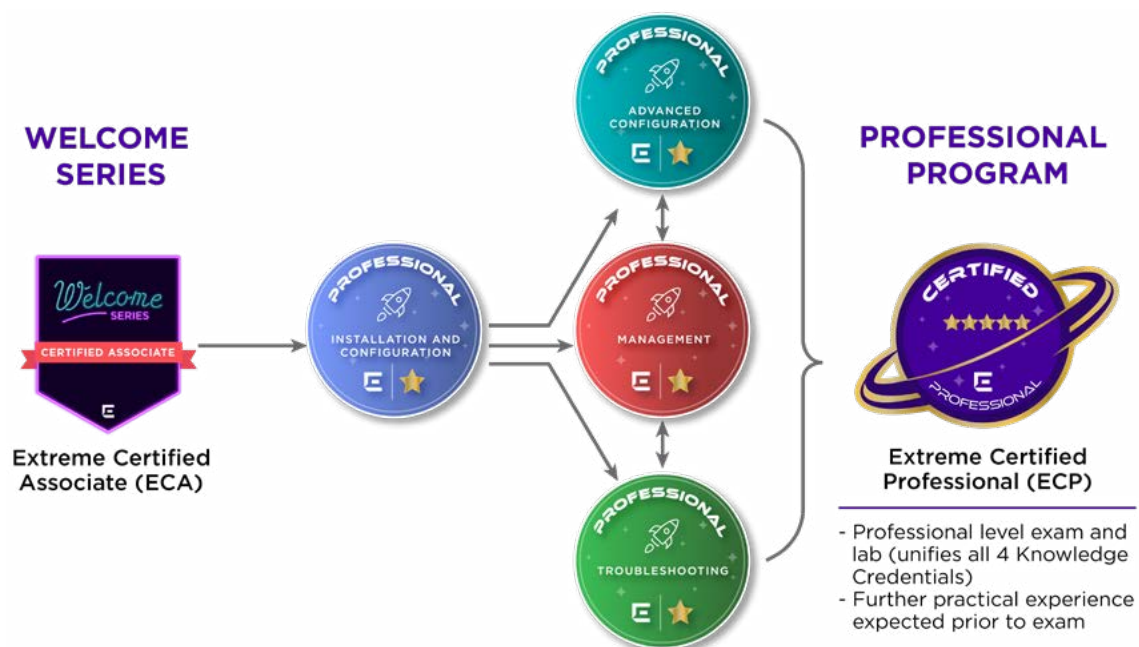

The Professional Program provides the unification of key skills coupled with knowledge credential choices to personalize to their role and expertise requirements.

- **Installation and Configuration** - the first Mandatory skill step on the progression path to the Professional certification

With specific Role Personas in mind, advanced skills preferences are provided to allow the development of skills fit for role requirements and business needs:

- **Advanced Configuration**
- **Management**
- **Troubleshooting**

Finally, to achieve Extreme Certified Professional accreditation, a practical assessment and exam will need to be passed unifying all the courses in the Professional Program.

LEARN WITH US

**Welcome Series Associate level certifications are the first step on the technical certification pathway with Extreme Networks before progressing to the Professional level curriculum.**

Welcome Series training introduces each technology track at an Associate level Certification. Training can be accessed for **free** via our [YouTube Channel](#):

- 'Meet ExtremeCloud IQ' - released
- 'Meet Extreme Fabric Connect' - coming summer 2022
- Welcome Series Training will be released for each technology track

Associate Certification Training can be accessed for free via our YouTube Channel and Professional Program class information is available via the website.

All training available will be displayed and linked to comprehensive class descriptions [here](#). If you are still unsure of where to find class information and book training, please contact [learn@extremenetworks.com](mailto:learn@extremenetworks.com).

We are Extreme Networks Training providing a comprehensive curriculum for the development of technical competency skills with industry wide recognition on the certification accomplishment.

We deliver free and easily accessible introductory industry knowledge through Extreme Academy, coupled with the Associate level of Extreme expertise in solutions and product portfolio through the Welcome Series, and creating a pathway to the optimum skills development in the attainment of the Extreme Professional level certification.

We enable people to be the best, to fulfil their professional aspirations, grow their knowledge and skills which in turns ensures they are able anticipate the needs of clients and end-users as they develop and implement industry-leading business solutions.
