Customer Experience
Specialization
Four CCIEs
→ → → Gold ← ← ←

With customized solutions, we support you in the setup of the necessary technology and special know-how on your way to the Cisco Channel Partner status.

Range of Technical Know-how

→ Partner Certification

Companies can certify as Select, Premier or Gold Partner and, thus, prove the range of their special competence. According to the aspired partner status, candidates have to provide proof of specializations with different know-how levels for a minimum number of qualified persons.

→ Partner Specialization

They mirror the status of the sales, technical or service-based expertise and depth of know-how in a technology. Within the specialization groups, various roles are to be distributed to different employees in the company: Account Manager (AM), System Engineer (SE), and Field Engineer (FE).

Channel Partner Specialization - Workshops Including Examinations

As an alternative to e-learning, we offer you individual workshops for the purpose of efficient preparation, making the students ready for the examinations in a purposeful manner. The preparation for the examination can be combined with further contents. Frequently, a 1- or 2-day workshop is the optimum solution.

Depth of Technical Know-how

-	Renewals Manager	none	CRM 700-805	EL

^{*} A recertification within the Partner Channel Specializations will only be necessary if the contents/examinations change significantly.

^{**} AM = Account Manager, SE = System Engineer, FE = Field Engineer, further qualifications required for specialization. Please also note the information about Cisco Role Sharing in the Web.

^{***} EL = Cisco E-Learning, OD = On-Demand, Workshops on request.
