

This two-day administrator-level course covers the installation of Content Manager. It discusses the Content Manager installation preparation, Content Manager installation, Enterprise Studio configuration, dataset restoration and upgrade, IDOL/ElasticSearch Indexing, content rendering, the Web Client, and additional workgroup server configuration and maintenance.

The course equips designated CM business administrators with the understanding required to plan and design a system to meet their enterprise needs. The hands-on lab exercises in this course use Content Manager software version 10.0.
