

3-5450

Data Protector Essentials

Data Protector provides enterprise protection in a single solution, which is a flexible and powerful way. Within Data Protector 11, you will find among other developments, deduplication, online application, and storage infrastructure support improvements to answer customers' most exigent requirements.

This five-day, entry-level, instructor-led training provides the essential knowledge to enable storage administrators to configure and manage Data Protector software. The hands-on lab exercises reinforce the theory sessions to ensure a thorough understanding of backup and recovery concepts, the functionality of the software, and its application to typical storage implementations.

Course Contents

- Course Overview
- What's New in Data Protector 10.91
