

App Volumes and Dynamic Environment Manager

This three-day course builds your skills in application management using VMware App Volumes™ and VMware User Environment Manager™. You learn how to use App Volumes to deliver applications and data to desktops and users in seconds. You gain skills in managing application lifecycles from installation to update and replacement. You also learn how to use User Environment Manager to provide personalization and dynamic policy configuration across virtual, physical, and cloud-based environments to simplify end-user profile management.

Course Contents

- Describe the features, functions, and architecture of App Volumes
- Create and deliver application packages in App Volumes
- Deliver App Volumes published applications to virtual desktops and on demand, using Horizon
- Run the App Volumes Application Capture Command-Line Program using appcapture.exe
- Perform advanced configuration of App Volumes
- Scale App Volumes to multiple locations and sites
- Describe the features, functions, and architecture of Dynamic Environment Manager
- Manage application configurations, user environment settings, and personalization settings using Dynamic Environment Manager
- Create predefined configurations for applications by using the Application Profiler
- Create predefined configurations for applications by using the Application Profiler
- Manage multiple environments using Dynamic Environment Manager
- Enable and synchronize the offline use of Dynamic Environment Manager by using SyncTool
- Using Horizon Smart Policies on the Horizon platform

E-Book You will receive the documentation of VMware in English language as an e-book.

Target Group

Experienced system administrators and system integrators responsible for implementing VMware Horizon®, Citrix XenApp and XenDesktop, and RDHS solutions

Prerequisites

- Experience with virtualized desktop implementation
- Familiarity with VMware Horizon
- VMware App Volumes Fundamentals (eLearning) recommended
- VMware User Environment Manager Fundamentals (eLearning) recommended
- VMware ThinApp Fundamentals (eLearning) recommended

Table of Contents

App Volumes and Dynamic Environment Manager

Course Introduction

Introductions and course logistics
Course objectives

Personalization settings
User environment settings
Condition sets
Application migration

Overview of App Volumes Enterprise

App Volumes
User Environment Manager
VMware ThinApp®

Application Configuration Management

Predefined and user-customized application settings
Using Application Profiler
Using the Self-Support Tool
Using the Helpdesk Support Tool

Overview of App Volumes

Features and benefits
Scalability and limitations
Storage group distribution strategies
App Volumes components

Installation of App Volumes

Infrastructure and system requirements
Installing and configuring App Volumes Manager
Installing the App Volumes agent

Working with AppStacks

Creating and provisioning AppStacks
Managing and updating AppStacks
Using AppStacks in virtual desktops
Using AppStacks in a Remote Desktop Services host
Best practices for AppStacks

Working with Writable Volumes

Default writable volume templates
Writable volume policies at creation
Updating and rescanning writable volumes

Overview of User Environment Manager

Features and benefits
User Environment Manager terminology
User environment settings and scope
User profile scenarios

Installation of User Environment Manager

Infrastructure and system requirements
User Environment Manager Agent (FlexEngine)
requirements
Group Policy configuration
Management Console configuration

User Environment Manager Settings
