

CCSEv1

Certified Cloud Security Engineer

With the increasing complexity of cyber attacks, a reactive approach alone is not enough. Dealing with the aftermath of a cloud security breach can be daunting, and organizations need to stay one step ahead of attacks to stay protected.

A single incident can have far-reaching consequences and requires the presence of experts with in-depth knowledge of cloud infrastructure and the challenges involved. The CCSE curriculum is designed to address the challenges organizations face when it comes to ensuring cloud security and enabling new team members to prepare for the job.

Course Contents

- Introduction to Cloud Security
- Platform and Infrastructure Security in Cloud
- Application Security in Cloud
- Data Security in Cloud
- Security Operations in Cloud
- Penetration Testing in Cloud
- Incident Response in Cloud
- Forensic Investigation in Cloud
- Business Continuity and Disaster Recovery in Cloud
- Governance, Risk management, and Compliance in Cloud
- Standards, Policies and Legal Issues in Cloud

Target Group

This course is suitable for anyone who wants to gain a comprehensive understanding of cloud security. Cloud Security Architect, Cloud Security Manager, Cloud Security Administrator and Cloud Security Engineer are some typical job roles.

Prerequisites

- Practical knowledge of network security
- Basic understanding of cloud computing concepts.
- You will need an account (preferably a new account in the free tier) for AWS, Azure and GCP cloud services to run labs.

Exam

Once you have completed the course and been assessed by EC-Council, you will receive a voucher from us for the "Certified Cloud Security Engineer 312-40" exam, which you can take at a VUE test center at no additional cost.

This Course in the Web
