

CIEC

Cisco CCIE Collaboration Workshop

This course is part of the Cisco Expert-Level Training for CCIE Collaboration blended learning curriculum that help students prepare for the Cisco CCIE Collaboration Lab Exam. It teaches students how to use an expert-level problem-solving process including options analysis to support complex Cisco Collaboration technologies and topologies. CIEC covers expert-level topics of quality of service (QoS), voice applications, dial plans, media resources and extension mobility cross clusters. The course includes a performance assessment lab which is graded twice during the course and comes with a detailed answer key. A Pre-Assessment lab is available for self-scheduling before or after the class. .

Course Contents

Quality of Service

- Voice Applications
- Globalized Call Routing
- Service Advertisement Framework
- Call Control Discovery
- Enhanced Location
- CAC Media Resources
- Codec Preferences
- SIP URI Dialing and Advanced SIP Deployments
- Intercluster Lookup Service
- Call-Routing Priorities
- Cisco EMCC Cisco Expert-Level Training for CCIE Collaboration Device Configuration Considerations
- Strategies Dial Plan Considerations and Strategies

Target Group

Channel Partners

- Customers
- Employees
- Network engineers who need expert-level problem-solving skills, including options analysis, to support complex Cisco Collaboration technologies and topologies
- Network designers who design and support complex Cisco Collaboration technologies and topologies
