

Check Point Multi-Domain Security Management Specialist R81.10

CCMS

Check Point Multi-Domain Security Management Specialist R81.10

With Multi-Domain Security Management, Check Point provides centralized, multi-tenant management for a large number of firewalls in separate security domains. One example of its use is a data center that wants to manage different customer networks centrally but still administratively separate.

This course provides a comprehensive understanding of the Check Point Multi-Domain Security Management solution and describes how it can be deployed in an enterprise network. The theoretical content is deepened in numerous practical exercises.

Course Contents

- Multi-Domain Installation and Configuration
- Multi-Domain Security Management
- Multi-Domain Log Management
- Multi-Domain High Availability
- Global Domain
- Global Policy Management
- Multi-Domain Troubleshooting

E-Book You will receive the original documentation as a Check Point e-Kit.

Target Group

An organization's security professionals who are responsible for the installation, configuration and management of MDSM solutions within the network security environment.

Prerequisites

Solid knowledge of Unix-based and/or Windows operating systems and TCP/IP networks is helpful.

Participants should have knowledge from the Check Point CCSA and CCSE certifications. The content from the CCVS and CCAS certifications is useful but not required.

Course Target

Acquire advanced skills to effectively secure and manage a multi-domain security network in an organization. Continue to gain knowledge of open source and check point troubleshooting tools and techniques to investigate and resolve complex issues.

Alternatives

Book this course together with *Check Point Certified VSX Specialist – CCVS* as *PowerPackage Check Point CCVS and CCMS* for the discounted price of € 3.950,-.
