DNAPUC

Programming Use Cases for Cisco Digital Network Architecture

The Programming Use Cases for Cisco Digital Network Architecture (DNAPUC) v1.0 course highlights the shift toward the digital enterprise and examines the components, benefits, and use cases of Cisco Digital Network Architecture (Cisco DNA) in an enterprise environment. You will learning about key platforms including Cisco® DNA Center, Cisco Webex Teams™, Cisco Connected Mobile Experiences (CMX), and their related APIs. This course also covers open standards, tools, and network APIs that you can use to complement the Cisco DNA software portfolio, including Python, JavaScript Object Notation (JSON), Network Configuration Protocol (NETCONF), Representational State Transfer Configuration Protocol (RESTCONF), and Yet Another Next Generation (YANG).

Course Contents
- Understanding Programmable Infrastructure
- Introducing Cisco DNA
- Describing Programmable Infrastructure
- Describing Network APIs
- Describing Cisco DNA Center APIs
- Describing Cisco Collaboration APIs
- Describing Cisco Mobility APIs
- Implementing DevOps Culture Within Network Operations

E-Book You will receive the original course documentation from Cisco in English language as a Cisco E-Book. In the Cisco Digital Learning Version, the content of the courseware is integrated into the learning interface instead.
