

# Dell NetWorker Administration

This course covers the concepts and administration of Dell NetWorker. You will learn key terminology, key management functions and the processes required to administer NetWorker. The course guides you through configuring NetWorker for operational use, managing user accounts, starting backup and restore procedures, and monitoring system activity. The course includes additional labs to reinforce these skills through hands-on practice.

## Course Contents

- Dell NetWorker Concepts
- Explore NetWorker Benefits
- Explore NetWorker Architecture
- Dell NetWorker Administration
- Examine NetWorker Users Management
- Explore NetWorker Daemons and Processes
- Manage and Track Media
- Examine Managing and Configuring Backup Devices
- Perform NetWorker Backups
- Managing the NetWorker Database
- Perform NetWorker Recoveries
- Performing Cloning and Staging
- Explore NetWorker Reporting and Logs
- Examine NetWorker and NMC Servers

## Target Group

This course is aimed at customers and partners whose roles are backup administrators, software support specialists and others who install, configure and support NetWorker in Windows and Linux environments.

## Prerequisites

- Windows or Linux system administration
- PowerProtect Data Domain systems and their administration
- Common concepts and principles of enterprise data protection and recovery
- Concepts for enterprise SAN/LAN

## Course Target

After completing the course, you will be able to use NetWorker resources and interfaces, configure and perform backup and restore operations, manage media and devices, perform cloning operations, use daemons and logs, and backup and restore the NetWorker Management Console and servers.
