

Dell NetWorker Implementation and Administration

This course explains and demonstrates how to deploy, configure and use NetWorker. Participants will learn how to deploy the NetWorker components, how to update NetWorker to the latest version and how to configure NetWorker for operation. They will also learn how to create and manage user accounts, how to configure and initiate data backup and restore, and how to monitor NetWorker operations. This course includes exercises to reinforce this knowledge.

Course Contents

- Dell NetWorker Concepts
- Dell NetWorker Implementation
- Dell NetWorker Administration

Each participant will receive the original documentation from Dell Technologies.

Target Group

This course is intended for Dell internal and external customers and partners who are backup administrators, software support specialists and others who install, configure and support NetWorker in Windows and Linux environments.

Prerequisites

In order to understand the content and successfully complete this course, a participant must have appropriate knowledge/skills, including an understanding of:

- Administration of Linux or Windows systems
- PowerProtect DD systems and administration
- Common concepts and principles for enterprise backup and recovery
- Enterprise SAN/LAN concepts

To book a Dell Technology course, you need an account with Dell in advance. You can set up this account at <https://education.dell.com> in the Sign in area (top right). Please note that you must sign in with your personal email address of your company.
