

# ISO 42001 Foundation

In the training course, you will learn the minimum requirements that must be met in accordance with ISO 42001 when introducing, maintaining and improving an AIMS and receive classification and assistance in this regard. Companies with an AIMS can prove to customers, regulatory authorities and other interested parties that their use of AI is safe, legally compliant and responsible. This ensures compliance and brings competitive advantages.

### Course Contents

- Fundamentals, opportunities, and risks of AI systems
- Introduction, maintenance, and improvement of an AI management system (AIMS) according to ISO/IEC 42001
- Planning activities, responsibilities, processes
- AI risk assessment, impact assessment, and treatment
- Goals and measures for effective and responsible AI use (Annex A)
- Implementation notes on the measures (Appendix B)
- Performance measurement and improvement of an AIMS through monitoring, audits, and management reviews
  
- Legal framework and related standards

### Examination

The examination is conducted online by the examination provider ICO-CERT. Once you have booked the examination, it is valid and accessible for 365 days from the date of validity. The exam can be taken at any time during this period. You can request suitable sample exams directly from ICO Cert.

### Target Group

This training is aimed at anyone who is interested in the introduction and operation of an AI management system or would like to participate in it in order to ensure the legally compliant, responsible and efficient use of AI.

- Potential AI officers, AI coordinators or AI managers
- Interested parties in the AI management system and the legally compliant use of AI
- Participants in the operation of an AI management system (AIMS)

### Prerequisites

There are no participation requirements for this basic training course.
