

ISO 42001 Professional

AI Representative

Become an AI representative in accordance with ISO 42001. The course takes an intensive and clear look at the planning, implementation and continuous improvement of an AI management system (AIMS) based on the international standard ISO/IEC 42001. After the training, you will know how to introduce an AIMS.

Course Contents

- Fundamentals, opportunities, and risks of AI systems
- Introduction, maintenance, and improvement of an AI management system (AIMS) according to ISO/IEC 42001
- Planning activities, responsibilities, processes
- AI risk assessment, impact assessment, and treatment
- Objectives and measures for effective and responsible use of AI (Annex A)
- Implementation guidance for the measures (Annex B)
- Performance measurement and improvement of an AIMS through monitoring, audits, and management reviews
- Integrated management systems (combined ISO standards)

- Legal framework and related standards

Examination

The examination is conducted online by the examination provider ICO-CERT. When you book the examination, it is valid and accessible for 365 days from the date of validity. The examination can be taken at any time during this period. You can request suitable sample examinations directly from ICO Cert.

Target Group

This training is aimed at anyone who is interested in the introduction and operation of an AI management system or would like to participate in it in order to ensure the legally compliant, responsible and efficient use of AI.

- Potential AI officers, AI coordinators or AI managers
- Interested parties in the AI management system and the legally compliant use of AI
- Participants in the operation of an AI management system (AIMS)

Prerequisites

The prerequisite for this training is the basic training ISO 42001 Foundation.

Course Target

The AI representative certification provides you with the knowledge to future-proof your organization. After training to become an AI representative in accordance with ISO 42001, you will know how to set up, introduce and continuously improve an AI management system (AIMS) in accordance with ISO/IEC 42001. An AIMS enables companies to reap the benefits of AI while reducing risks by systematically and permanently ensuring that AI is used safely, efficiently and in compliance with the law.
