

Kubernetes Package Management with HELM

Templates, Chart Management, and Values

HELM is a package manager for Kubernetes that significantly simplifies the deployment, management and versioning of applications. Similar to apt or yum on Linux systems, HELM enables the installation of complex Kubernetes applications with just a few commands.

HELM uses so-called charts that bundle all the necessary Kubernetes resources and configurations. This allows applications to be deployed in a standardized, reproducible and maintainable way. HELM also facilitates updates and rollbacks, which increases operational reliability.

This HELM training provides a practical introduction to the use of HELM and shows how you can make your Kubernetes projects more efficient, scalable and professional.

Course Contents

- Introduction to HELM
- HELM basics
- HELM templates and the template engine
- Chart management and rollout
- HELM values
- Debugging, troubleshooting, and testing with HELM
- Continuous deployment and GitOps

E-Book The detailed digital documentation package, consisting of an e-book and PDF, is included in the price of the course.

Target Group

The course is aimed at anyone who would like an overview of the features and functionality of HELM and is interested in the technical aspects of implementation and operation.

Prerequisites

Basic knowledge of Linux as well as basic networking and IT skills are required. In addition, you should have the knowledge taught in the courses Kubernetes - Orchestration in Detail and Kubernetes Advanced - Complex Deployments, Network Configuration and Interfaces.

EXPERTeach

Our Training Offer for You:

Classroom Training

The live training experience in our training centers or on your premises on-site.

Online Training

Attend your course in online mode – without travel and accommodation expenses and effort.

Hybrid Training

Classroom & online in one course – choose how you wish to participate in your training event.

In-house Training

We create your customized training concepts for your project.

Guaranteed Course Dates

ExperTech guaranteed course dates allow for secure and reliable planning.
