MB-800T00

Microsoft Dynamics 365 Business Central Functional Consultant

Dynamics 365 Business Central is designed for small and medium-sized businesses and is an application for organizations that have outgrown their entry-level applications.Expanding businesses often outgrow their basic accounting software or legacy enterprise resource planning (ERP) systems, which are unable to handle increased inventory and transactions, are not integrated with other lines of business, and have reporting limitations.Companies also face the challenge of providing services that are more scalable, mobile and available in the cloud.

With Business Central, you can manage your finances, automate and secure your supply chain, sell smarter, improve customer service and project performance, and optimize your operations.
