

MPLS

Implementing Cisco MPLS

MPLS integrates the performance and traffic-management capabilities of data link Layer 2 with the scalability and flexibility of network Layer 3 routing. When used in conjunction with other standard technologies, MPLS allows service providers the ability to support value-added features that are critical for their networks. The focus of this course is on MPLS technology issues as those issues apply to service providers and on how to configure new features and functions in an existing routed environment.

Upon completion of the course, students will have the knowledge and skills to:

- Describe the features of MPLS
- Describe how MPLS labels are assigned and distributed
- Identify the Cisco IOS tasks and command syntax necessary to implement MPLS on frame-mode Cisco IOS platforms
- Describe the MPLS peer-to-peer architecture and explain the routing and packet forwarding model in this architecture
- Identify the Cisco IOS command syntax required to successfully configure, monitor, and troubleshoot VPN operations
- Identify how the MPLS VPN model can be used to implement managed services and internet access
- Describe the various internet access implementations that are available and the benefits and drawbacks of each model
- Provide an overview of MPLS Traffic Engineering

Course Contents

Module 1: MPLS Features

- Module 2: Label Assignment and Distribution
- Module 3: Frame-Mode MPLS Implementation on Cisco IOS Platforms
- Module 4: MPLS Virtual Private Network Technology
- Module 5: MPLS VPN Implementation
- Module 6: Complex MPLS VPNs
- Module 7: Internet Access and MPLS VPNs
- Module 8: MPLS Traffic Engineering Overview

E-Book You will receive the original course documentation from Cisco in English language as a Cisco E-Book. In the Cisco Digital Learning Version, the content of the courseware is integrated into the learning interface instead.

Target Group

The course is aimed at network administrators, managers, designers and system engineers who are involved in the implementation of MPLS and MPLS-TE. Participation is recommended as preparation for the MPLS exam.

Prerequisites

Cisco Certified Network Associate (CCNA) certification or equivalent level of working knowledge and experience

- Completion of CCNA Basics and ICND courseware is recommended training for CCNA
- Equivalent knowledge and skill that can be acquired by attending Cisco's training courses Building Scalable Cisco Internetworks (BSCI) and Configuring BGP on Cisco Routers (BGP)
- Practical experience with deploying and operating networks based on Cisco network devices and Cisco IOS is strongly recommended
- The QoS course is highly recommended because QoS knowledge is assumed in several sections of the course

Processing time

approx. 30 hours

This Course in the Web

You can find the up-to-date information and options for ordering under the following link:

www.expertech-training.com/go/MPLC

Reservation

On our Website, you can reserve a course seat for 7 days free of charge and in a non-committal manner. This can also be done by phone under +49 6074/4868-0.

Guaranteed Course Dates

To ensure reliable planning, we are continuously offering a wide range of guaranteed course dates.

Your Tailor-Made Course!

We can precisely customize this course to your project and the corresponding requirements.

Cisco Digital Learning

This course is available in the Cisco Digital Learning Library. These recently developed, multi-modal training events include HD videos moderated by lecturers with stored searchable text and subtitles, as well as exercises, labs, and explanatory text and graphics. We provide this offer to you via our myExpertech learning portal. Effective of the activation of the account, access to the courses will be granted for a duration of 6 months. In the case of packet solutions (Cisco Digital Learning Subscriptions), this time period will amount to 12 months.

Cisco Digital Learning	Prices, excl. of V.A.T.
12 Monate Freischaltung	€ 750

Training	Prices, excl. of V.A.T.
Classes in Germany	5 Days € 3,395
Online Training	5 Days € 3,395
Date/course venue	Course language German
09/12-13/12/24	12/05-16/05/25
09/12-13/12/24	12/05-16/05/25

Status 06/23/2024

Table of Contents

MPLS – Implementing Cisco MPLS

Course Introduction

Module 1: MPLS Concepts

Lesson 1: Introducing Basic MPLS Concepts
Lesson 2: Introducing MPLS Labels and Label Stack
Lesson 3: Identifying MPLS Applications
Lesson 4: Module Summary
Lesson 5: Module Self-Check

Module 2: Label Assignment and Distribution

Lesson 1: Discovering LDP Neighbors
Lesson 2: Introducing Typical Label Distribution in Frame-Mode MPLS
Lesson 3: Introducing Convergence in Frame-Mode MPLS
Challenge 1: Implement the Service Provider's and Customer's IP Addressing and IGP Routing
Lesson 4: Module Summary
Lesson 5: Module Self-Check

Module 3: Frame-Mode MPLS Implementation on Cisco IOS Platforms

Lesson 1: Introducing CEF Switching
Lesson 2: Configuring Frame-Mode MPLS on Cisco IOS Platforms
Lesson 3: Monitoring Frame-Mode MPLS on Cisco IOS Platforms
Lesson 4: Troubleshooting Frame-Mode MPLS on Cisco IOS Platforms
Challenge 2: Implement the Core MPLS Environment in the Service Provider Network
Lesson 5: Module Summary
Lesson 6: Module Self-Check

Module 4: MPLS Virtual Private Network Technology

Lesson 1: Introducing Virtual Private Networks
Lesson 2: Introducing MPLS VPN Architecture
Lesson 3: Introducing the MPLS VPN Routing Model
Lesson 4: Forwarding MPLS VPN Packets
Lesson 5: Module Summary
Lesson 6: Module Self-Check

Module 5: MPLS VPN Implementation

Lesson 1: Using MPLS VPN Mechanisms of Cisco IOS Platforms
Lesson 2: Configuring an MP-BGP Session Between PE

Routers

Lesson 3: Configuring VRF Tables
Lesson 4: Configuring Small-Scale Routing Protocols Between PE and CE Routers
Lesson 5: Monitoring MPLS VPN Operations
Challenge 3: Implement EIGRP Based VPNs
Lesson 6: Configuring OSPF as the Routing Protocol Between PE and CE Routers
Challenge 4: Implement OSPF Based MPLS VPNs
Lesson 7: Configuring BGP as the Routing Protocol Between PE and CE Routers
Challenge 5: Implement BGP Based MPLS VPNs
Lesson 8: Troubleshooting MPLS VPNs
Lesson 9: Module Summary
Lesson 10: Module Self-Check

Module 6: Complex MPLS VPNs

Lesson 1: Introducing Overlapping VPNs
Lesson 2: Introducing Central Services VPNs
Lesson 3: Introducing the Managed CE Routers Service
Lesson 4: Module Summary
Lesson 5: Module Self-Check

Module 7: Internet Access and MPLS VPNs

Lesson 1: Combining Internet Access with MPLS VPNs
Lesson 2: Implementing Internet Access in the MPLS VPN Environment
Lesson 3: Module Summary
Lesson 4: Module Self-Check

Module 8: MPLS Traffic Engineering Overview

Lesson 1: Introducing MPLS Traffic Engineering Components
Lesson 2: MPLS Traffic Engineering Operations
Lesson 3: Configuring MPLS Traffic Engineering on Cisco IOS Platforms
Lesson 4: Monitoring Basic MPLS TE on Cisco IOS Platforms
Challenge 6: Implement MPLS Traffic Engineering
Lesson 5: Module Summary
Lesson 6: Module Self-Check
