

Oracle SBC Configuration and Administration

This Oracle Session Border Controller (SBC) course teaches technical network professionals how to successfully configure the SBC in both service provider and enterprise environments. The course covers the basics of Session Initiation Protocol (SIP), SBC concepts, configuration for peering (SIP trunking) and access backbone implementations, routine operations and more.

Taking this course will help you develop a deeper understanding of Session Initiation Protocol (SIP) fundamentals as well as system and protocol specific SBC configuration. The content covered applies equally to service provider and enterprise deployments. You will be introduced to more SBC architecture, concepts and administration in the form of configuration management (backups, restores and revision control) by participating in hands-on exercises.
