- Working with different technologies in Power Automate for Desktop
- Implementing advanced logic in Power Automate for Desktop
- Acquiring expertise with Power Automate for Desktop

E-Book The original Microsoft courseware is made available to you online.

Target Group

If you are a developer with a keen interest in delivering automated solutions for your organization, this certification may be right for you. With Microsoft Power Automate, you will automate time-consuming and repetitive tasks. You will review solution requirements, create process documentation and design, develop, implement, integrate, troubleshoot and evaluate solutions. In collaboration with project participants from the company, you will help to improve and automate company workflows.

Prerequisites

Candidates should have experience with the following: JSON, cloud flows and desktop flows, integrating solutions with REST and SOAP services, analyzing data using Microsoft Excel, VBScript and Visual Basic for Applications (VBA), HTML, JavaScript, at least one programming language, Microsoft Power Platform tool suite (AI Builder, Power Apps, Dataverse and Power Virtual Agents).

Course Target

Completion of the PL-500 exam leads to the certification Microsoft Certified: Power Automate RPA Developer Associate.
