

Palo Alto Networks EDU 210

Firewall Essentials: Configuration and Management

After successfully completing the five-day training course, participants will have in-depth knowledge of the configuration and management of Palo Alto Networks® Next-Generation Firewalls. Course participants work in a lab environment and learn hands-on how to configure, manage and monitor a firewall.

Course Contents

- Palo Alto Networks Portfolio and Architecture
- Connect to the Management Network
- Manage Firewall Configurations
- Manage Firewall Administrator Accounts
- Connect to Production Networks
- The Cyberattack Lifecycle
- Block Threats Using Security and NAT Policies
- Block Packet- and Protocol-Based Attacks
- Block Threats from Known Bad Sources
- Block Threats by Identifying Applications
- Maintain Application-Based Policies
- Block Threats Using Custom Applications
- Block Threats by Identifying Users
- Block Threats by Identifying Devices
- Block Unknown Threats
- Block Threats in Encrypted Traffic
- Prevent Use of Stolen Credentials
- Block Threats Using Security Profiles
- View Threat and Traffic Information
- Next Steps

E-Book You will receive the documentation of Palo Alto in English language as an e-book.

Target Group

This course is aimed at security engineers, security administrators, security operations specialists, security analysts, network engineers and IT support staff.

Prerequisites

Basic knowledge of network concepts including routing, switching and IP addressing is an advantage. Participants should also be familiar with basic security concepts. Experience with other security technologies (IPS, proxy and content filtering) is helpful.

Course Target

Training recommendations for Next-Generation Firewall Engineer certification:

- Firewall: Configuration and Management (EDU-210)
- Palo Alto Networks Panorama: NGFW Management (replaces EDU-220)
- Firewall: Troubleshooting (EDU-330) (optional, but recommended)

The training is also good preparation for Network Security Professional certification.
