Palo Alto Networks Prisma Access SSE: Configuration and Deployment

The Prisma Access SSE: Configuration and Deployment course (replaces EDU-318) provides an in-depth look at the deployment, configuration and management of Prisma Access with Strata Cloud Manager "SCM". You will gain the necessary skills to protect remote networks and mobile users with a cloud-based Secure Access Service Edge (SASE) solution and equip your organization with modern, scalable and cloud-based network security.

Course Contents
• **Deploy and configure Prisma Access:** Master the operational deployment of Prisma Access as a Secure Access Service Edge (SASE) solution to deliver seamless network connectivity and robust security from the cloud.
• **Hands-On Experience:** Get practical, lab-based training to configure, manage, and troubleshoot Prisma Access using Strata Cloud Manager—ensuring you're fully equipped to secure remote networks and mobile users.
• **Enhance Your Security Strategy:** Develop the skills necessary to protect applications and remote infrastructures with a modern, SASE approach tailored for today's dynamic workforce.

E-Book You will receive the documentation of Palo Alto in English language as an e-book.

Target Group
This course is aimed at Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts and Network Engineers.

Prerequisites
To get the most out of the Prisma Access SSE: Configuration and Deployment training, we strongly recommend that you complete the Firewall Configuration and Management (EDU-210) course first.

Why? Because Prisma Access is built on the core principles of Palo Alto Networks' Next-Generation Firewalls (NGFWs) and a solid understanding of firewall configuration is essential before delving into the advanced topics of SSE security.

Course Target
The training is recommended as preparation for the Palo Alto Networks Certified Security Service Edge Engineer certification.
