

PowerPackage Check Point CCSE and CCTE

Certified Security Expert & Troubleshooting Expert

PowerPackage Check Point CCSE and CCTE

This PowerPackage combines the contents of the Check Point Certified Security Expert R81.20 – CCSE and Check Point Certified Troubleshooting Expert R81.20 courses in one event.

On the one hand, this course is aimed at those who want to expand their learned knowledge of the basic operation of the Check Point Firewall with the release R81.20 and offers the broadening and deepening view of the technology for this purpose. Further, the training is designed for security professionals who want to expand their troubleshooting skills to perform advanced troubleshooting on Check Point network installations. Content includes upgrading concepts and practices, key tips and techniques to increase network performance, and additional management and troubleshooting features to mitigate security risks.

Course Contents

Part 1:

- Management Upgrade and Migration
- Management High Availability
- Security Gateway Upgrades
- Advanced Check Point Maintenance
- Security Gateway Operations
- Policy Installation
- Gaia and Management APIs
- Acceleration
- Site-to-Site VPN
- Remote Access VPN
- Mobile Access VPN
- Clustering
- Advanced Logs and Monitoring

Part 2:

- Introduction to Advanced Troubleshooting
- Advanced Management Server Troubleshooting
- Advanced Troubleshooting with Logs and Events
- Advanced Gateway Troubleshooting
- Advanced Firewall Kernel Debugging
- Advanced Access Control Troubleshooting
- Advanced Identity Awareness Troubleshooting
- Advanced Site-to-Site VPN Troubleshooting
- Advanced Client-to-Site VPN Troubleshooting

Target Group

The course is designed for system administrators, support staff, and network engineers who want to expand their knowledge of Check Point Firewall. Those seeking CCSE R81.20 and CCTE R81.20 certifications should attend this course.

Prerequisites

Students should have the knowledge gained from the Check Point Certified Security Administrator R81.20 – CCSA course. Furthermore, knowledge of UNIX and Windows operating systems, certificate management, system administration, and TCP/IP protocol stacks is helpful to successfully complete this course.
