

## Privileged Access Management (PAM) Administration

**Please note:** CyberArk provides all participants with a free exam voucher. You will receive an email from CyberArk after the course.

This course covers the CyberArk solutions Enterprise Password Vault (EPV), Privileged Session Management (PSM) and Privileged Threat Analytics (PTA). CyberArk administrators or "Vault Admins" will get extensive hands-on experience managing the PAS solution using our step-by-step practice guide in a dedicated practice environment. This course provides participants with the knowledge and skills required to manage, monitor and troubleshoot an existing PAM implementation. In addition to software concepts such as monitoring and troubleshooting, topics such as PAM architecture, password management and PSM are also explained.

### Course Contents

- Describe the system architecture and flows
- Successfully manage passwords (verification, change, and reconciliation)
- On-board accounts using Automatic Accounts Discovery and the Password Upload Utility
- Configure PSM session isolation and monitoring
- Monitor sessions, view recorded sessions
- Use the PTA to monitor privileged account activity in the network
- Describe how connections through a PSMP can be established
- Modify Master Policy settings
- Produce reports on various system and user activities
- Monitor the CyberArk implementation
- Describe and configure the various logs that are available to troubleshoot problems
- Utilize the knowledge base and other available resources to resolve problems
- Perform common administrative tasks

Each participant will receive the original course documentation from CyberArk in English language as a PDF document.

### Target Group

Persons who will be responsible for the administration of the PAM solution. Anyone who wants to learn more about the CyberArk Privileged Security solution or who needs to install, configure and set up the solution for the first time.

### Prerequisites

- Basic network knowledge
- Basic Windows administration skills
