

# Privileged Access Management (PAM) Administration

## Privileged Access Management (PAM) Administration

The course covers CyberArk's core PAM Solution: Enterprise Password Vault (EPV), Privileged Session Management (PSM) solutions, and Privileged Threat Analytics (PTA). CyberArk administrators, or 'Vault Admins', gain extensive hands-on experience in administering the core PAS Solution using our step-by-step exercise guide and dedicated lab environment.

### Course Contents

- Describe the system architecture and flows
- Successfully manage passwords (verification, change, and reconciliation)
- On-board accounts using Automatic Accounts Discovery and the Password Upload Utility
- Configure PSM session isolation and monitoring
- Monitor sessions, view recorded sessions
- Use the PTA to monitor privileged account activity in the network
- Describe how connections through a PSMP can be established
- Modify Master Policy settings
- Produce reports on various system and user activities
- Monitor the CyberArk implementation
- Describe and configure the various logs that are available to troubleshoot problems
- Utilize the knowledge base and other available resources to resolve problems
- Perform common administrative tasks

Each participant will receive the original course documentation from CyberArk in English language as a PDF document.

### Target Group

Individuals who will be responsible for the Administration of the PAM solution.
