

## Ruby for Advanced Learners

### Advanced Features

The Ruby programming language is an object-oriented and platform-independent interpreter language. It has become an alternative to established languages such as Java or Python in important areas of application programming. The training covers some of Ruby's advanced features that enable more flexible and efficient programming. Some aspects of meta programming such as dynamic methods and decorators as well as good practices are discussed. The content is accompanied and deepened by practical exercises.

#### Course Contents

- Recapitulation of some Ruby basics
- Metaprogramming
- Procs and lambdas
- Dynamic methods
- Decorators
- Good Practice
- Logging
- Rspec testing
- Documentation
- Practice exercises

**E-Book** The detailed digital documentation package, consisting of an e-book and PDF, is included in the price of the course.

#### Target Group

The course is aimed at anyone who wants to refine and expand their existing Ruby skills.

#### Prerequisites

Basic knowledge of Ruby programming

#### This Course in the Web

You can find the up-to-date information and options for ordering under the following link:

[www.experteach-training.com/go/RUBA](http://www.experteach-training.com/go/RUBA)

#### Reservation

On our Website, you can reserve a course seat for 7 days free of charge and in a non-committal manner. This can also be done by phone under +49 6074/4868-0.

#### Guaranteed Course Dates

To ensure reliable planning, we are continuously offering a wide range of guaranteed course dates.

#### Your Tailor-Made Course!

We can precisely customize this course to your project and the corresponding requirements.

| Training           | Prices, excl. of V.A.T. |         |
|--------------------|-------------------------|---------|
| Classes in Germany | 2 Days                  | € 1,795 |
| Online Training    | 2 Days                  | € 1,795 |
| Dates upon request |                         |         |

## Ruby for Advanced Learners – Advanced Features

|              |                                          |              |                                                 |
|--------------|------------------------------------------|--------------|-------------------------------------------------|
| <b>1</b>     | <b>Wiederholung</b>                      | <b>4.3.4</b> | Automatische Tests - Stringsuche                |
| <b>1.1</b>   | Variablen                                | <b>4.3.5</b> | Automatische Tests zusammen mit Logger          |
| <b>1.2</b>   | Schleifen                                | <b>4.3.6</b> | Dokumentation                                   |
| <b>1.3</b>   | Methoden und Klassen                     | <b>4.4</b>   | Wiederholung - Lösungen                         |
| <b>1.4</b>   | Vererbung und Super                      | <b>4.4.1</b> | Rekursive Methoden - Lösung                     |
| <b>1.5</b>   | Module                                   | <b>4.4.2</b> | Vererbung - Lösung                              |
| <b>1.6</b>   | Ausnahmen und Rescue                     | <b>4.4.3</b> | Module und Ausnahmen - Lösung                   |
| <b>2</b>     | <b>Metaprogramming</b>                   | <b>4.5</b>   | Metaprogramming - Lösungen                      |
| <b>2.1</b>   | Vorbereitung                             | <b>4.5.1</b> | Lambdas und Procs - Lösung                      |
| <b>2.1.1</b> | Procs und Lambdas                        | <b>4.5.2</b> | Send & define_method - Lösung                   |
| <b>2.1.2</b> | Send & define_method - Lösung            | <b>4.5.3</b> | Dynamische Methoden - Lösung                    |
| <b>2.2</b>   | Dynamische Methoden                      | <b>4.5.4</b> | Methode erzeugt Methoden - Lösung               |
| <b>2.2.1</b> | Methoden kopieren                        | <b>4.5.5</b> | Basisdekorator - Lösung                         |
| <b>2.2.2</b> | Methode erzeugt Methoden                 | <b>4.5.6</b> | SimpleDelegator - Lösung                        |
| <b>2.3</b>   | Dekoratoren                              | <b>4.5.7</b> | Method Missing - Lösung                         |
| <b>2.3.1</b> | Basisdekorator                           | <b>4.6</b>   | Good Practice - Lösungen                        |
| <b>2.3.2</b> | SimpleDelegator                          | <b>4.6.1</b> | Logger - Lösung                                 |
| <b>2.3.3</b> | Hausgemachter Dekorator - method_missing | <b>4.6.2</b> | Formatter - Lösung                              |
| <b>3</b>     | <b>Good Practice</b>                     | <b>4.6.3</b> | Automatische Tests - Fibonacci - Lösung         |
| <b>3.1</b>   | Was ist Logging und brauche ich es?      | <b>4.6.4</b> | Automatische Tests - Stringsuche - Lösung       |
| <b>3.1.1</b> | Logger                                   | <b>4.6.5</b> | Automatische Tests zusammen mit Logger - Lösung |
| <b>3.1.2</b> | Formatter                                | <b>4.6.6</b> | Dokumentation - Lösung                          |
| <b>3.2</b>   | Rspec - Testing                          |              |                                                 |
| <b>3.2.1</b> | Weitere nützliche Matcher                |              |                                                 |
| <b>3.3</b>   | Dokumentation                            |              |                                                 |
| <b>3.3.1</b> | Dokumentation - besser gemacht           |              |                                                 |
| <b>4</b>     | <b>Übungen</b>                           |              |                                                 |
| <b>4.1</b>   | Wiederholung                             |              |                                                 |
| <b>4.1.1</b> | Rekursive Methoden                       |              |                                                 |
| <b>4.1.2</b> | Vererbung                                |              |                                                 |
| <b>4.1.3</b> | Module und Ausnahmen                     |              |                                                 |
