SLX Configuration and Implementation

This course provides a detailed insight into the Extreme SLX product family and its use in an enterprise network. It covers the configuration, operation and maintenance of Extreme SLX products as well as the configuration and implementation of IP fabrics.

Course Contents

- Course Introduction
- SLX Products Overview
- SLX Architecture
- SLX Use Cases
- Essentials and Administration
- Firmware Upgrades
- L2 Forwarding
- VLAN and Port Configuration
- LACP and LLDP Configuration
- Protocol Independent Routing
- Configuring IP Fabrics
- Advanced Configuration of IGP's
- Advanced Configuration of BGP
- Configuration of MPLS
- MPLS Traffic Engineering
- ACLs and Security
- SLX Analytics
- SLX Applications
- Basic Troubleshooting

You will receive the original course documentation by Extreme Networks as a pdf file.

E-Book For this course you will receive the original documentation from Extreme Networks as a PDF file.

Target Group

This course is designed for network administrators, system administrators, network architects, system engineers and technicians involved in the advanced installation, configuration, maintenance and basic troubleshooting of SLX products. The course also prepares students for the Extreme Networks Data Center SLX - SLX Installation and Configuration exam.

Prerequisites

Participants should have a sound basic knowledge of the various network protocols. At the same time, a basic knowledge of network implementation is helpful. These prerequisites can be obtained, for example, through the course TCP/IP - Protocols, Addressing, Routing.

Table of Contents

SLX Configuration and Implementation

Course Introduction

SLX Products Overview

SLX Architecture

- SLX Architecture
- SLX Hardware
- OS Architecture

SLX Use Cases

- Deployment Scenarios
- Spine and Leaf
- Case study

Essentials and Administration

- Access
- System Configuration
- SNMP and NTP etc

Firmware Upgrades

- Software Image Download
- Upgrading Process
- Config Backup
- Best Practices

L2 Forwarding

- L2 Frame forwarding
- L2 Redundancy
- Packet flow

VLAN and Port Configuration

- VLAN Configuration
- Edge Port Configuration
- Trunk Port Configuration

LACP and LLDP Configuration

- Link Aggregation
- LACP Configuration
- LLDP Configuration

Protocol Independent Routing

- Static Routes Configuration
- Aggregate Routes Configuration
- Default Routes

Configuring IP Fabrics

- IP Fabric
- Configuring IP Fabrics
- Monitoring Commands

Advanced Configuration of IGP's

- Configuring OSPF
- Monitoring of OSPF
- OSPF Scalability
- Multi Area OSPF
- Advanced features of OSPF

Advanced Configuration of BGP

- Configuring BGP
- BGP Route selection
- BGP Attributes
- BGP Route advertisements

Configuration of MPLS

- MPLS Signalling Protocols
- MPLS Tunnel establishment
- MPLS Label Distribution
- MPLS tunnel configuration
- MPLS troubleshooting commands

MPLS Traffic Engineering

- RSVP
- Traffic Engineering
- Configuration
- Monitoring and troubleshooting

ACLs and Security

- ACLs
- Configuring ACLs
- ACL filtering

sFlow

- Configuring sFLOW
- Monitoring

SLX Analytics

SLX Applications

Basic Troubleshooting
