Training Introduction to the TOGAF® Standard

TOGAF® is a globally established framework for the management of complex enterprise architectures. The training teaches the basics of enterprise architecture with a focus on integration into the existing management environment in the company.

This course refers to the latest version - TOGAF® EA Foundation/ Practitioner Training.

Course Contents
- Introduction to EAM
- TOGAF® basics
- Integration into/differentiation from other common management frameworks such as COBIT®, ITIL® or IT4IT
- Presentation of TOGAF® ADM as the standard approach for EAM
- Overview of other TOGAF® components

You will receive detailed training. Examples from practical projects are presented for each chapter.

Target Group
This training is aimed at managers in companies facing major challenges in terms of IT and business-IT alignment.

In particular in situations with a high need for transparency with regard to the interrelationships in the company or a strategy-compliant alignment of the project portfolio. The training is also aimed at specialists and managers who require a deeper understanding of EAM or TOGAF® without aiming for certification.

Prerequisites
No special prior knowledge is required.
