

Using AI tools and LLMs successfully

ChatGPT, Gemini, Claude & Co.

The use of language models (LLM) and AI tools is revolutionizing everyday work. AI can help with many applications, such as the automation of processes. However, the handling and application of these technologies must be learned and understood.

This AI training course offers a sound introduction to working with AI. In addition to prompting, you can also expect an overview of AI tools, best practices and the legal situation. Integrating AI into your processes with the help of no-code solutions rounds off the course. Learn to understand AI and use it correctly!

Course Contents

- Prompting techniques
- Problem framing
- Best practices
- AI basics
- Integrating AI into processes
- Provider overview
- Tool overview
- No-code usage
- Legal framework
- Basic concepts of machine learning

Target Group

This course is aimed at users who want to make better use of AI in their day-to-day work.

Prerequisites

No prerequisites are necessary for successful participation in this course. You just need to be interested and enjoy acquiring new skills.

Course Target

You will gain an understanding of the basic use of AI. You will understand how good prompts are written, which tasks AI is particularly suitable for and how this technology can best be used. You will also gain an overview of various products and tools that can support you in your work.

This Course in the Web
