

MOC20334

Core Solutions of Microsoft Skype for Business 2015

This course teaches IT professionals how to plan, deploy, configure, and administer a Microsoft Skype for Business 2015 solution. Students will learn how to deploy a multi-site and highly available Skype for Business infrastructure that supports instant messaging, conferencing, persistent chat, archiving, and monitoring. Students will also learn how to manage, maintain, and troubleshoot issues in the infrastructure. This course focuses primarily on the on-premises deployment of Skype for Business, but does include information on how to integrate the on-premises deployment with Skype for Business Online as well as how to migrate from previous versions of Lync Server. This course helps the student prepare for Exam 70-334.

Kursinhalt

- Designing the Skype for Business 2015 Topology
- Installing and Implementing Skype for Business Server 2015
- Administering Skype for Business Server 2015
- Configuring Users and Clients in Skype for Business 2015
- Configuring and Implementing Conferencing in Skype for Business 2015
- Implementing Additional Conferencing Options in Skype for Business Server 2015
- Designing and Implementing Monitoring and Archiving in Skype for Business 2015
- Deploying Skype for Business 2015 External Access
- Implementing Persistent Chat in Skype for Business 2015
- Implementing High Availability in Skype for Business 2015

- Integrating with Skype for Business 2015 Online
- Planning and Implementing an Upgrade to Skype for Business 2015

E-Book Die Original-Unterlagen von Microsoft erhalten Sie als E-Book (dMOC).

Zielgruppe

IT professionals who are responsible for the Skype for Business deployment in their organizations. Experience with previous versions of Lync Server is beneficial but not required to take this course. Students should be proficient with Active Directory Domain Services, data networks, and telecommunications standards and components that support the configuration of Skype for Business. Students should also be familiar with Exchange Server and Office 365. IT professionals who are looking to take the exam 70-334A: Core Solutions of Skype for Business 2015, as a stand-alone, or as part of the requirement for the MCSE: Communications certification will take this course as preparation material.

Voraussetzungen

Folgende Voraussetzungen werden vom Hersteller empfohlen:

- Minimum of two years of experience administering Windows Server, including Windows Server 2008 R2 or Windows Server 2012
- Minimum of two years of experience working with Active Directory
- Minimum of two years of experience working with name resolution, including DNS
- Experience working with certificates, including PKI certificates
- Experience working with Windows PowerShell
- Understanding of data networks and telecommunications standards and components
