APM220

Advanced APM for Cisco AppDynamics

The Advanced APM for Cisco AppDynamics (APM220) training shows you that planning and mapping Cisco AppDynamics to your application is a critical step to successfully monitor your applications. In this training, you will practice some useful strategies for discovering, prioritizing, and managing the Business Transactions that are most important to your business. You'll also learn to use various tools and techniques to find and resolve issues in your application before they impact your customers or your business.

Kursinhalt

- Understand how to configure business transactions, custom backends, baselines, JMX Metrics, and Windows Performance Counters
- Describe key components for business transactions
- Learn how to customize error detection
- Describe information points and data collectors
- Learn how to address memory issues with automatic leak detection and object instance tracking

E-Book Sie erhalten die englischen Original-Unterlagen als Cisco E-Book.

Zielgruppe
