

This course is an ideal starting point for individuals who want to learn about Cisco TelePresence. This course covers Cisco TelePresence basics, including an introduction to some of the terminology and the Cisco TelePresence portfolio with simple explanations on what each product type does. In addition, learn the basics of the SIP and the H.323 protocols and how they are used. For IP beginners, there are also sessions on the basics of IP.

In addition, more detailed product information is provided on the Cisco TelePresence C Series endpoints, Cisco TelePresence Video Communication Server, Cisco TelePresence multipoint control unit (MCU) range, and Cisco TelePresence Management Suite.

Learning Objectives

At the end of the course, students will be able to meet the following objectives:

- Describe a telepresence call
- Recognize audio and video input and output devices
- Recognize different endpoint types and their intended use and describe the main role of telepresence infrastructure components within the Cisco portfolio
- Describe the protocols and standards used for audio and video
- Describe the protocols and standards used over IP for telepresence traffic
- Describe the effects room environments have on telepresence
- Describe the features and functions of the Cisco TelePresence System Codec C Series
- Describe the features and functions of the Cisco TelePresence Video Communication Server
- Describe the features and functions of the Cisco TelePresence MCU
- Describe the features and functions of the Cisco TelePresence Management Suite
- Be able to design a simple network utilizing Cisco TelePresence System Codec C Series codecs with a single Cisco TelePresence Video Communication Server, Cisco TelePresence MCU, and Cisco TelePresence Management Suite

Course Agenda This course introduces Cisco TelePresencenetworks and terminology. The student will learn how to assist customers with simple telepresence network design utilizing the Cisco TelePresence System Codecs and endpoints, Cisco TelePresence Video Communication, Cisco TelePresence MCUs, and Cisco TelePresence Management Suite.
