

Splunk Enterprise Administration Fast Start

Dieser Kurs richtet sich an Systemadministratoren und Administratoren, die für die Verwaltung der Splunk Enterprise-Umgebung verantwortlich sind:

- für die Verwaltung der Splunk Enterprise Umgebung. Der Kurs vermittelt die grundlegenden Kenntnisse des Splunk Lizenzmanagers, der Indexer und der Suchköpfe. Er behandelt die Konfiguration, Verwaltung und Überwachung der Kernkomponenten von Splunk Enterprise.
- für das Einlesen von Daten in Splunk Indexer. Der Kurs vermittelt die grundlegenden Kenntnisse über Splunk Forwarder und Methoden, um Remote-Daten in Splunk Indexer zu bekommen. Er deckt die Installation, Konfiguration, Verwaltung, Überwachung und Fehlerbehebung von Splunk Forwardern und Splunk Deployment Server Komponenten ab.

NUR für Kunden mit Splunk on-prem

Kursinhalt

- System Administration
- Splunk Deployment Overview
- License Management
- Splunk Apps
- Splunk Configuration Files
- Users, Roles, and Authentication
- Getting Data In
- Distributed Search
- Data Administration
- Understand sourcetypes
- Manage and deploy forwarders
- Configure data inputs
- Fire monitors
- Network inputs (TCP/UDP)
- Scripted inputs
- HTTP inputs (via the HTTP Event Collector)
- Customize the input phase parsing process
- Define transformations to modify data before indexing
- Define search time knowledge object configurations

Zielgruppe

Systemadministratoren

Voraussetzungen

Um erfolgreich zu sein, sollten die Teilnehmer ein solides Verständnis der Inhalte des folgenden Kurses haben:

- Splunk Power User Fast Start

Kursziel

Splunk Enterprise Certified Admin (Voraussetzung für diese Zertifizierung: Splunk Core Certified Power User)

	13.10.-16.10.25 HY Online
	10.11.-13.11.25 ON Online
	15.12.-18.12.25 ON Online

Stand 07.05.2025

EXPERTeach

Inhaltsverzeichnis

Splunk Enterprise Administration Fast Start

Splunk Enterprise System Administration

Module 1 - Splunk Server Deployment

Provide an overview of Splunk
Identify Splunk Enterprise components
Identify the types of Splunk deployments
List the steps to install Splunk
Use Splunk CLI commands

Module 2 - Splunk Server Monitoring

Enable the Monitoring Console (MC)
Identify Splunk license types
Describe license violations
Add and remove licenses
Use Splunk Diag

Module 3 - Splunk Apps

Describe Splunk apps and add-ons
Install an app on a Splunk instance
Manage app accessibility and permissions

Module 4 - Splunk Configuration Files

Describe Splunk configuration directory structure
Understand configuration layering process
Use btool to examine configuration settings

Module 5 - Splunk Indexes

Learn how Splunk indexes function
Identify the types of index buckets
Add and work with indexes
Overview of metrics index

Module 6 - Splunk Index Management

Review Splunk Index Management basics
Identify data retention recommendations
Identify backup recommendations
Move and delete index data
Describe the use of the Fishbucket
Restore a frozen bucket

Module 7 - Splunk User Management

Add Splunk users using native authentication
Describe user roles in Splunk
Create a custom role
Manage users in Splunk

Module 8 - Configuring Basic Forwarding

Identify forwarder configuration steps

Configure a Universal Forwarder
Understand the Deployment Server

Module 9 - Distributed Search

Describe how distributed search works
Define the roles of the search head and search peers

Splunk Enterprise Data Administration

Module 1 - Introduction to Data Administration

Provide an overview of Splunk
Describe the four phases of the distributed model
Describe data input types and metadata settings
Configure initial input testing with Splunk Web
Testing Indexes with Input Staging

Module 2 - Getting Data In - Staging

Identify Splunk configuration files and directories
Describe index-time and search-time precedence
Validate and update configuration files

Module 3 - Configuring Forwarders

Identify the role of production indexers and forwarders
Understand and configure Universal Forwarders
Understand and configure Heavy Forwarders
Understand and configure intermediate forwarders
Identify additional forwarder options

Module 4 - Forwarder Management

Describe Splunk Deployment Server (DS)
Manage forwarders using deployment apps
Configure deployment clients and client groups
Monitor forwarder management activities

Module 5 - Monitor Inputs

Create file and directory monitor inputs
Use optional settings for monitor inputs
Deploy a remote monitor input

Module 6 - Network and Scripted Inputs

Create network (TCP and UDP) inputs
Describe optional settings for network inputs

Module 7 - Agentless Inputs

Create a basic scripted input

Module 8 - Fine Tuning Inputs

Configure Splunk HTTP Event Collector (HEC)
agentless input
Describe Splunk App for Stream

Module 9 - Parsing Phase and Data

Identify Linux-specific inputs
Identify Windows-specific inputs

Module 10 - Manipulating Raw Data

Understand the default processing that occurs during input phase
Configure input phase options, such as source type fine-tuning and character set encoding

Module 11 - Supporting Knowledge Objects

Understand the default processing that occurs during parsing
Optimize and configure event line breaking
Explain how timestamps and time zones are extracted or assigned to events
Use Data Preview to validate event creation during parsing phase

Module 12 - Creating a Diag

Explain how data transformations are defined and invoked
Use transformations with props.conf and transforms.conf to:
Mask or delete raw data as it is being indexed
Override sourcetype or host based upon event values
Route events to specific indexes based on event content
Prevent unwanted events from being indexed
Use SEDCMD to modify raw data

Module 13 - Supporting Knowledge Objects

Define default and custom search time field extractions
Identify the pros and cons of indexed time field extractions
Configure indexed field extractions
Describe default search time extractions
Manage orphaned knowledge objects
