

VMware App Volumes and User Environment Manager on Horizon

This three-day course builds your skills in application management using VMware App Volumes™ and VMware User Environment Manager™. You learn how to use App Volumes to deliver applications and data to desktops and users in seconds. You gain skills in managing application lifecycles from installation to update and replacement. You also learn how to use User Environment Manager to provide personalization and dynamic policy configuration across virtual, physical, and cloud-based environments to simplify end-user profile management.

Kursinhalt

- Course Introduction
- Overview of App Volumes Enterprise
- Overview of App Volumes
- Installation of App Volumes
- Working with AppStacks
- Working with Writable Volumes
- Overview of User Environment Manager
- Installation of User Environment Manager
- User Environment Manager Settings
- Application Configuration Management
- JMP and Horizon 7 Overview

E-Book Jeder Teilnehmer erhält englischsprachige Unterlagen von VMware als E-Book.

Zielgruppe

Experienced system administrators and system integrators responsible for implementing VMware Horizon®, Citrix XenApp and XenDesktop, and RDSH solutions

Voraussetzungen

It is recommended that you attend the following self-paced eLearning courses before attending this course:

- VMware Horizon 7 Fundamentals
- VMware App Volumes Fundamentals
- VMware User Environment Manager Fundamentals
- VMware ThinApp® Fundamentals

Experience with virtualized desktop implementation is helpful.

Inhaltsverzeichnis

VMware App Volumes and User Environment Manager on Horizon

1 Course Introduction

- Introductions and course logistics
- Course objectives

2 Overview of App Volumes Enterprise

- Just-in-Time Management Platform
- App Volumes
- User Environment Manager
- VMware ThinApp

3 Overview of App Volumes

- Features and benefits
- Scalability and limitations
- Storage group distribution strategies
- App Volumes components

4 Installation of App Volumes

- Infrastructure and system requirements
- Installing and configuring App Volumes Manager
- Installing the App Volumes agent
- AppVolumes in Horizon
- Certificates in AppVolumes

5 Working with AppStacks

- Creating and provisioning AppStacks
- Managing and updating AppStacks
- Using AppStacks in virtual desktops
- Using AppStacks in a Remote Desktop Services host
- Using Microsoft Office Applications on AppStacks
- Best practices for AppStacks

6 Working with Writable Volumes

- Comparing AppStacks with Writable Volumes
- Creating Writable Volumes
- Assigning and attaching Writable Volumes
- Default Writable Volume templates
- Updating and rescanning Writable Volumes
- Move, back up, and restore Writable Volumes

7 Overview of User Environment Manager

- Features and benefits
- User Environment Manager terminology
- User environment settings and scope
- User profile scenarios
- Components of User Environment Manager

8 Installation of User Environment Manager

- Infrastructure and system requirements
- User Environment Manager Agent (FlexEngine) requirements
- Group Policy configuration
- Management Console configuration
- NoAD Mode

9 User Environment Manager Settings

- Personalization settings
- User environment settings
- Condition sets
- Application migration
- Application blocking
- Privilege elevation

10 Application Configuration Management

- Predefined and user-customized application settings
- Using Application Profiler
- Using the Self-Support Tool
- Using the Helpdesk Support Tool

11 JMP and Horizon 7 Overview

- Benefits of JMP
- JMP and Horizon 7 Components
- JMP Integrated Workflow
- JMP Server installation and configuration
- App Volumes and User Environment Manager deployment considerations
- Leverage Smart Policy on the Horizon 7 platform
